

# *Parked and Driving Modes*

## **Driving Mode**

In this mode, the user can toggle between geofencing-based continuous-tracking modes and 5-minute-park modes. The user has an option to press [x] to cancel if the wrong location is shown. When switching to continuous-tracking, the user has an option to select an existing trail, for more accurate location tracking. Short version of deals and things to do pop up depending on location.

## **Parked Mode**

A snapshot of the venue is shown, with a mini-map of location in corner. The user can review where they have been, and, optionally remove locations. More details on deals and things to do pop up. The user can also access the deal map and browse through other details.
