

Location Add Confirmation

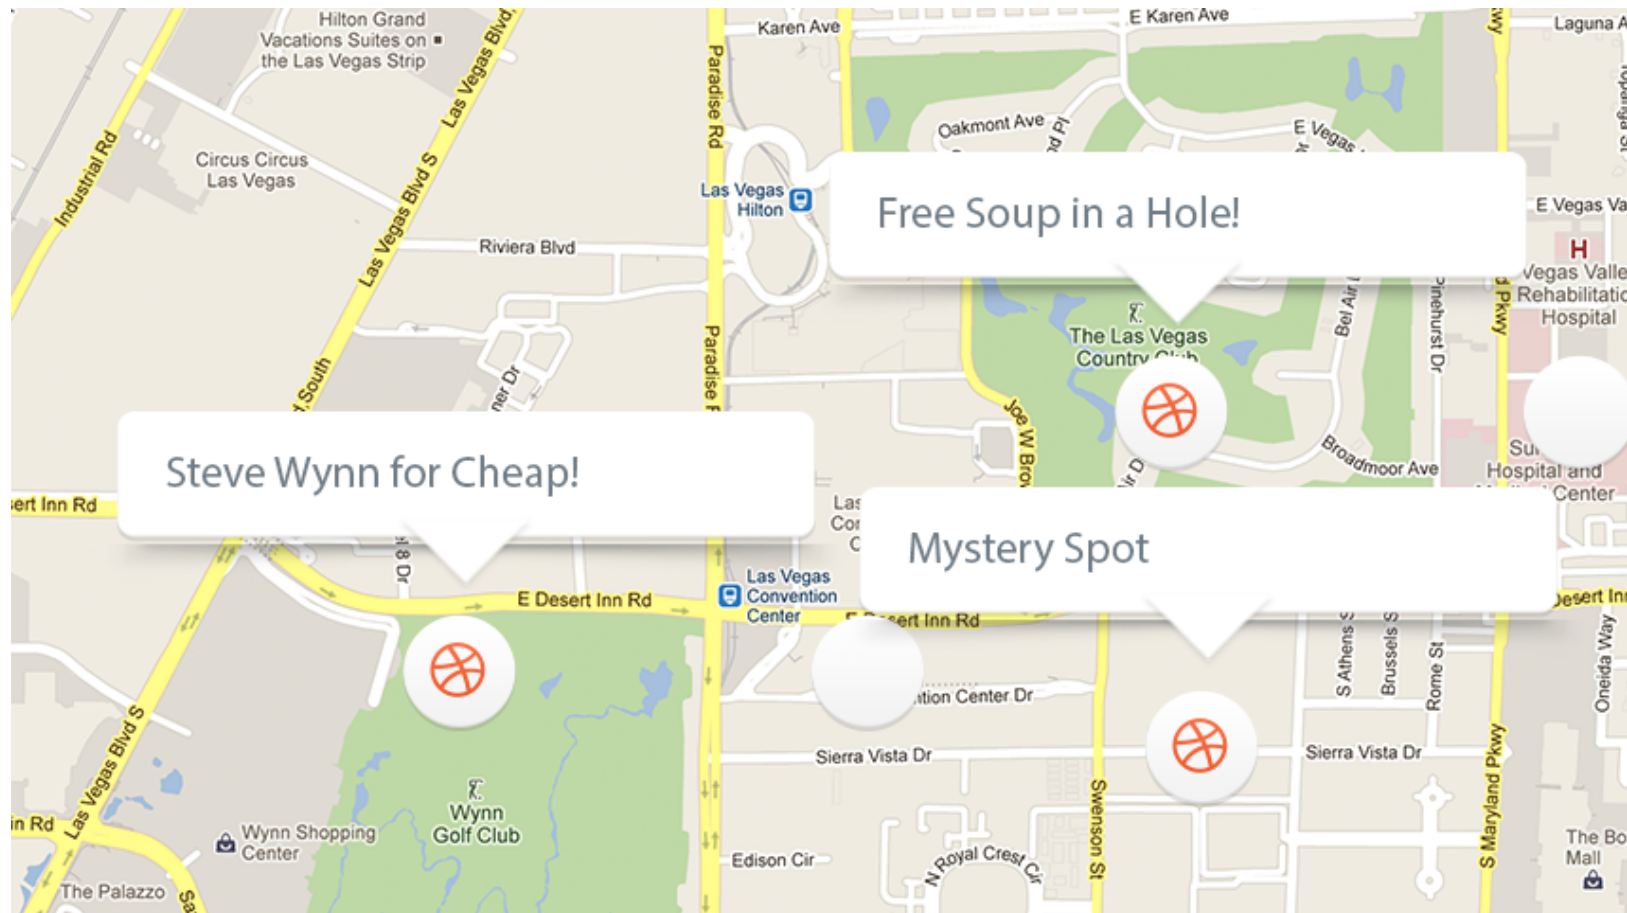

Geofenced data attempts to gauge the best possible venue you're parked at with star-rating certainty. Confirm/Cancel current location. Location is automatically stored in 30 seconds, if there is no further input.

Select Trail for precision check-in

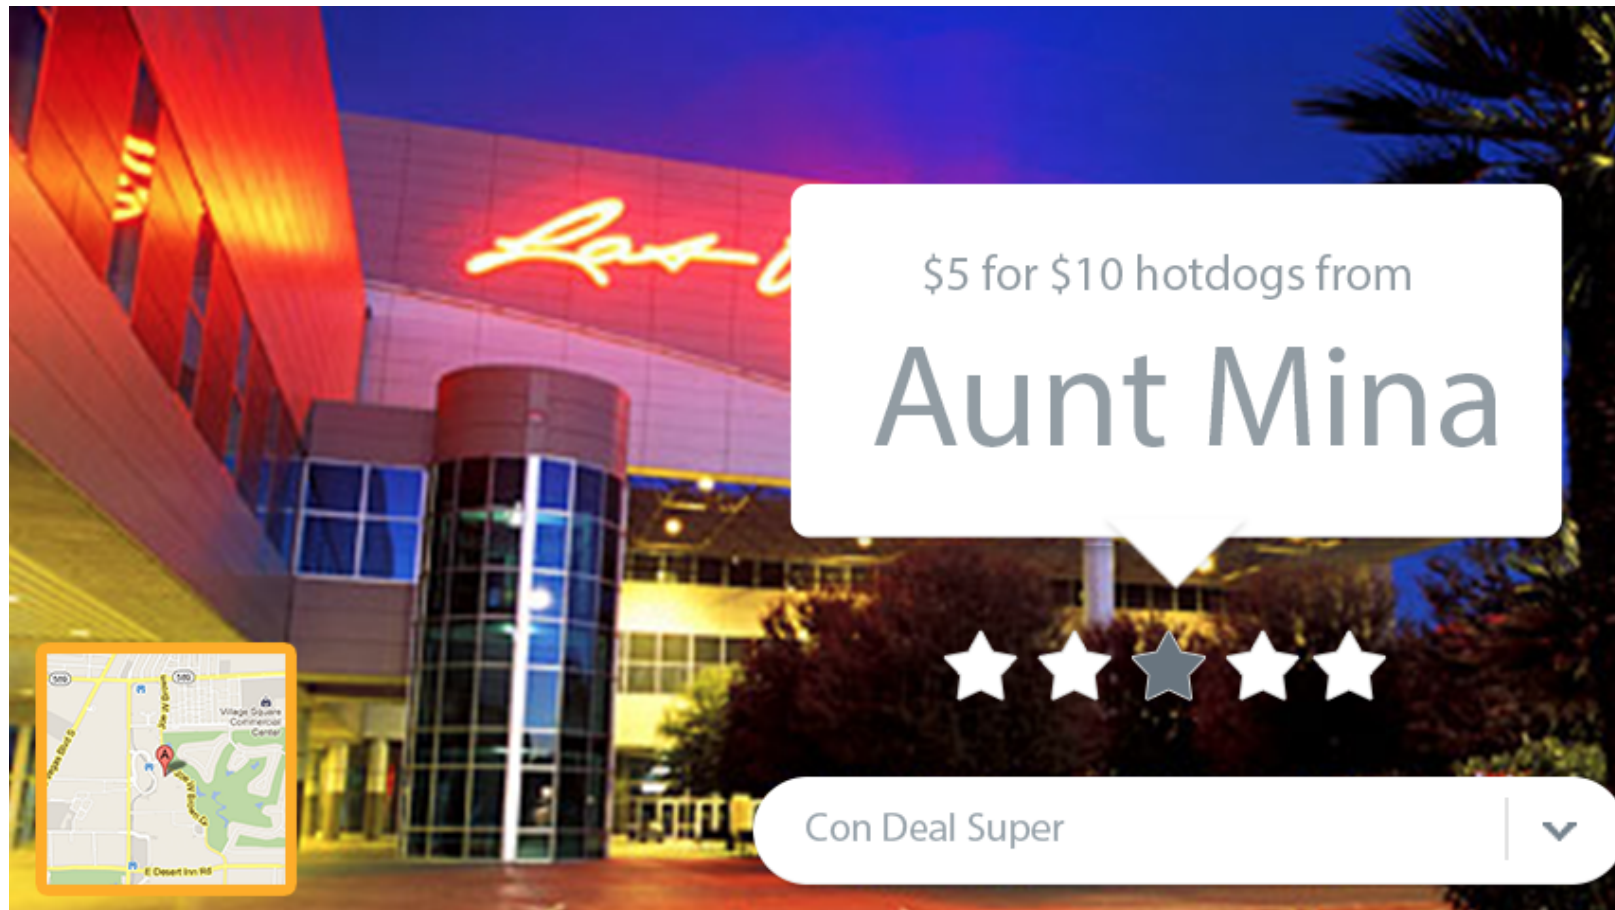

Selecting a trail would assign a unique venue name to each geolocation, for accurate geofencing aware check-in's.

Deals Nearby

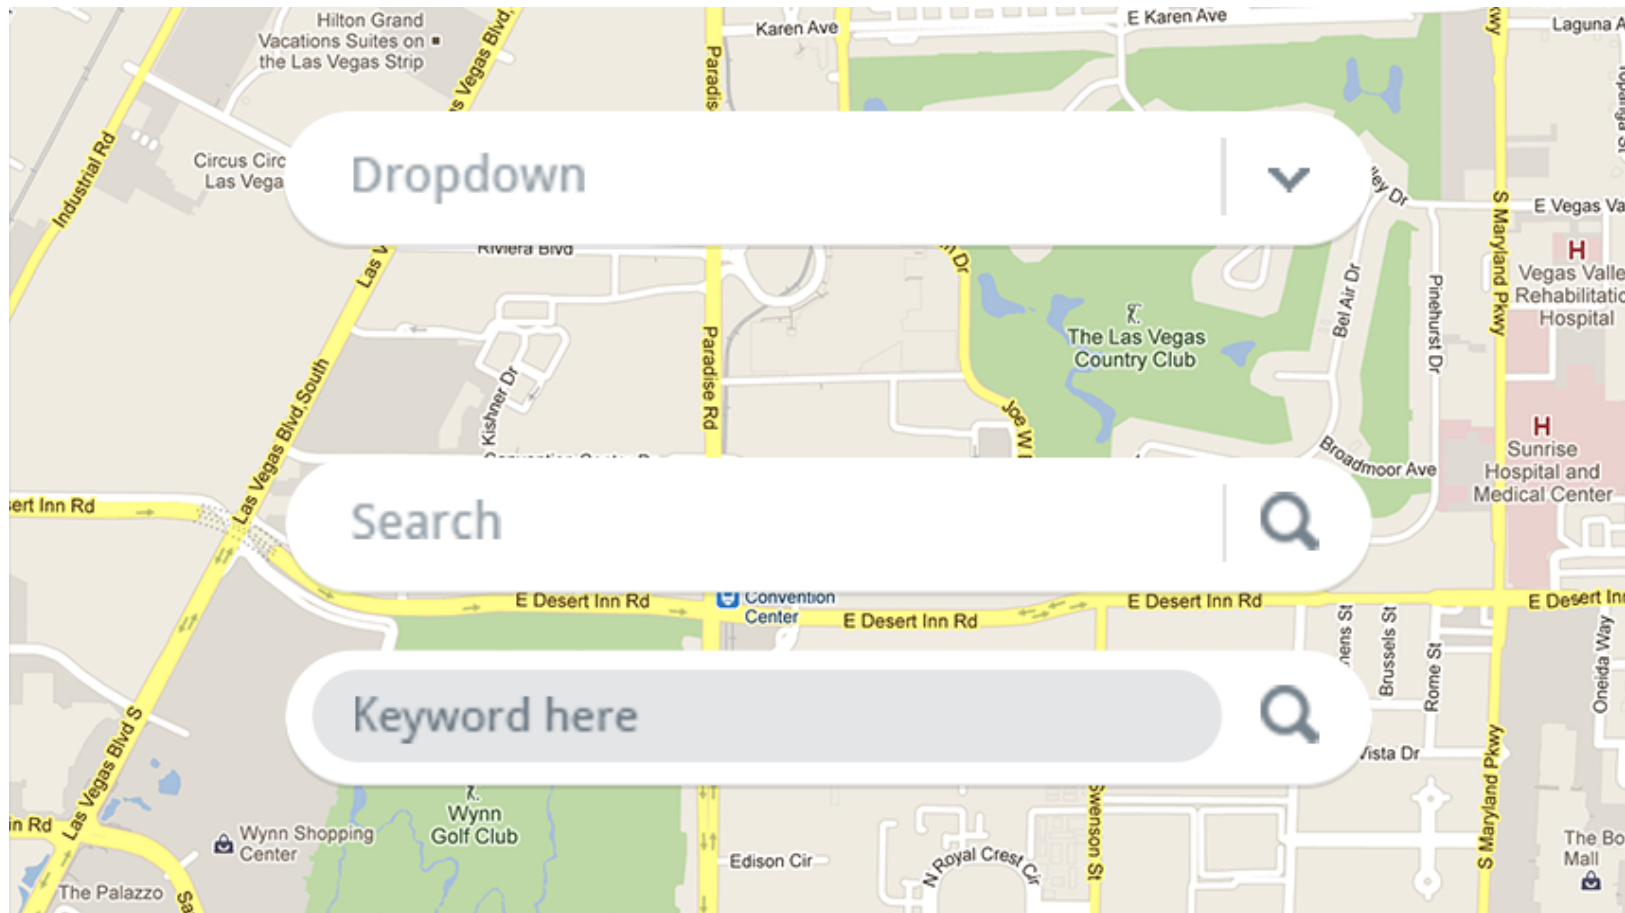

Touch to visit each POI or to find out more about that deal!

Venue Confirmation

Experience even more POI and deals once you confirm your venue. Mini-Map puts you back in map mode. Drop-down list of other deals and details!

List and Search Options

Access the data locker's information about a location in a variety of ways, from dropdown menus to search input fields to keyword input by category. Each time you select something you can also find out how many others have selected it.
